## Summary

**React.js Developer** with **3+ years of hands-on experience** building **scalable, high-performance web applications** across startup and open-source projects. Expert in **React.js (Hooks, Context, Functional Components)**, **TypeScript**, **state management** (Redux, Zustand, React Query), and **component-based architecture**. Skilled in **responsive design**, **a11y**, and **API integrations (REST & GraphQL)**.

## Skills

### React Core

React.js (Hooks, Context, Functional Components) JavaScript (ES6+)
TypeScript Semantic HTML CSS3 & Tailwind CSS
Responsive Design Accessibility (a11y)
State Management (Redux, Zustand, React Query)
Component-Based Architecture
Performance Optimization & Debugging
Version Control (Git, GitHub/GitLab)

### Ecosystem & APIs

Next.js (SSR, SSG, ISR, API Routes, Middleware)
Progressive Web Apps (PWA)
RESTful API Development & Integration
GraphQL (queries & mutations) WebSockets / Socket.io
Node.js & Express.js Testing (Jest, React Testing Library)
Code Review & Mentoring Cross-Browser Compatibility

### Tooling & DevOps

Vite Webpack
PostgreSQL MongoDB
Docker Python
AWS (EC2, S3)
CI/CD Pipelines (Jenkins, GitHub Actions)
GPT/Claude AI APIs

## Experience

### Full Stack Developer | Sep 8 2025 - Present

**Confidential** On-Site

Developed and scaled production-grade applications, including **Kotak MF** (mutual fund platform), **Mapinger** (indoor wayfinding system), **Panchang** (Indian calendar platform), and **HumMP**.

- Collaborated within a large, cross-functional team to build and optimize key features for the Kotak Mutual Fund (Kotak MF) platform.
- Built multi-block indoor navigation with full CRUD operations, accessible routing with elevator detection, and automatic level transitions.
- Implemented responsive SVG maps with offline support and comprehensive analytics dashboard with event campaign management.
- Created a multi-calendar system supporting lunar, solar, and Gregorian conversions with a complete blogging platform.
- Developed full-stack solution using Next.js, achieving optimal performance and SEO optimization.

### Software Development Engineer (SDE) | Dec 2024 - Jun 2025

**ITSoftLab** On-site

Built backend and admin features for **Mediscan Super Admin** — a multi-branch appointment and payment management platform.

- Developed responsive admin dashboards using React and Next.js, reducing page load time by 30%.
- Implemented secure REST APIs in Node.js for appointments and reporting, reducing response time by 25%.
- Integrated Razorpay payments and role-based access control to improve transaction security.
- Led code reviews, mentored junior developers, and documented reusable component libraries.

### Open Source Contributor | Jun 2025 - Jul 2025

**Hono-Docs** Remote

Created **hono-docs** — an NPM library that auto-generates OpenAPI docs from Hono.js routes.

- Built a typed route parser to convert Hono.js route definitions into valid OpenAPI JSON.
- Authored package documentation, examples, and quick-start guides to improve developer adoption.
- Published the package with 50+ developer installs, reducing manual doc generation effort.

### Full Stack Developer | Jan 2023 - July 2024

**GoRack** Remote

Led the design and development of core web applications and media platforms, including **IDCOLAB**, **NOON**, **Replenish MD**, and the flagship **GoRack** platform.

- Architected and integrated 3D model rendering pipelines for IDCOLAB using Babylon.js & Pannellum, enabling interactive visualization for 10,000+ monthly active users.
- Developed HLS/DASH audio streaming APIs for NOON, improving media streaming latency by 18%.
- Built SEO-optimized, responsive single page applications with React and Next.js, boosting organic traffic by 40%.
- Established robust CI/CD processes with GitHub Actions, reducing release cycle times by 40%.
- Collaborated on system architecture, troubleshooting, and documentation to maintain high code quality and velocity.

## Personal Projects

### RayAuth

OAuth2 + OpenID Connect authentication provider (React/Next.js frontend, Node.js backend).

- Developed secure token-based authentication flows with JWT and OAuth2.
- Improved authentication latency by 15% through API and client-side optimization.

### Jenkins-AWS Pipeline

CI/CD workflow with tag-based deployments to AWS EC2 & ECR via Jenkins.

- Automated deployment pipeline that reduced release cycles by 40%.
- Integrated automated tests and rollback mechanisms to improve release reliability.

### Busmate

Real-time college bus tracking (React Native mobile + React web dashboard).

- Implemented real-time location updates with WebSockets for 200+ students.
- Built a responsive React dashboard with live map integration and offline fallback for poor networks.

### Ray

CLI tool for encrypted credential & snippet management.

- Secured developer credentials with AES encryption.
- Improved developer productivity by enabling quick snippet retrieval via CLI.

## Educations

**Bachelor of Science in Information Technology** Nov 2022 - Jul 2026
Malwa Institute Of Science & Technology
RGPV University

**Higher Secondary (12th Grade)** Jun 2020 - Sep 2021
Ever Green English H.S. School
Indore, MP
